Mathematical Biosciences

Mathematical Biosciences is abstracted or indexed in Applied Mechanics Review, Biological Abstracts, CABS/ Current Awareness in Biological Sciences, Chemical Abstracts, Current Contents, Engineering Index, Excerpta Medica, INSPEC, International Abstracts of Biological Sciences, Mathematical Reviews, and Medicus/ MEDLINE.

Volume 167

S.-F. Hsu Schmitz, Effects of treatment or/and vaccination on HIV transmission in homosexuals with genetic heterogeneity 1

O.A. Smirnova, Mathematical modeling of mortality dynamics of mammalian populations exposed to radiation 19

W.-Y. Tan and Z. Ye, Estimation of HIV infection and incubation via state space models 31

L. Esteva and C. Vargas, Influence of vertical and mechanical transmission on the dynamics of dengue disease 51

J.M. Hyman and J. Li, An intuitive formulation for the reproductive number for the spread of diseases in heterogeneous populations 65

B. Hernández-Bermejo, V. Fairén and A. Sorribas, Power-law modeling based on least-squares criteria: consequences for system analysis and simulation 87

A. Zorin, M. Mayer-Proschel, M. Noble and A.Y. Yakovlev, Estimation problems associated with stochastic modeling of proliferation and differentiation of O-2A progenitor cells in vitro 109

C.D. Eggleton, A. Vadapalli, T.K. Roy and A.S. Popel, Calculations of intracapillary oxygen tension distributions in muscle 123

P. Vicini, H.-T. Su and J.J. DiStefano III, Identifiability and interval identifiability of mammillary and catenary compartmental models with some known rate constants 145

M. Broom, Bounds on the number of ESSs of a matrix game 163

S.B. Hsu, Y.-S. Li and P. Waltman, Competition in the presence of a lethal external inhibitor 177
